Mobile Computing Platform (MCP)? What is the

What do I need to do?

Return Material Authorization (RMA)

An RMA number is needed before returning anything to Omnitracs. To obtain an RMA number, log onto iq.omnitracs.com or call Omnitracs Customer Support at (800) 541-7491.

RMAs are issued for defective individual components only.

Do not return the entire bag.

If you have an RMA number that authorizes the return of the Mobile Application Server (MAS) or Terrestrial Data Modem (TDM):

- Disconnect the power.
- 2. Disconnect only those cables that are absolutely necessary.
- 3. Snip the fasteners (also known as "Christmas trees") that attach it to the bag.

Installing the replacement component is simple because each cable fits only one receptacle. Use the new fasteners and ties to secure the hardware and cables.

If you have an RMA number authorizing the return of the Media Display Unit (MDU):

- Disconnect the power.
- Remove the back housing of the MDU with a #10 Torx Allen wrench.
- 3. Snip the cable tie wraps.
- Disconnect the coiled display cable.
- 5. Replace the housing.

When the new display arrives, reattach the cable by following step 4 on the other side of this Installation and Service Guide.

NOTE: REMOVE THE BATTERY before returning the MAS. The replacement will **NOT** include a new battery.

Including it will incur a disposal fee and require the purchase of a new battery.

INSTALLATION AND SERVICE GUIDE

Mobile Computing Platform (MCP) Portable Unit

WARNING

Driver - Do not use while vehicle is in motion.

Use while driving will cause distraction and loss of vehicle control which may lead to serious injury or death.

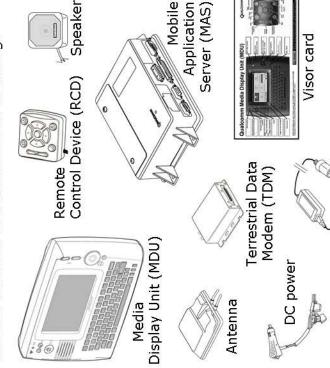

Start Here

MCP Terrestrial Portable Unit

Easy Setup

Take inventory

Confirm that the unit contains the following:

R AC power adapter been used, locate the: If the unit has never

battery Backup # 10 Torx Allen

Plan the installation

Carefully select places for:

- The antenna, giving it a clear view of the sky. Example: on the dash by the windshield.
- The remote control, allowing you to reach for it without taking your eyes off the road. Example: near the radio. d
- The speaker, taking into consideration the noise level in the cab. m
- The unit, finding a place where you can zip it up and keep it out of the way while driving. Example: behind your seat. 4

MAY CONTAIN U.S. AND INTERNATIONAL EXPORT CONTROLLED INFORMATION

Install the backup battery m

These steps in Section 3 are required only ONCE, prior to the first usage. If others have already used the unit, skip to Section 6.

Open the MAS battery door using the #10 Forx Allen wrench.

Insert the battery's connector into the socket 'n

Apply power

Replace the door.

Attach the coiled display cable 4

The steps in Section 4 are also required only ONCE.

back housing with a Remove the MDU's wrench or driver. #10 Torx Allen
